

AMENDMENT NO. 2 OCTOBER 2014
TO
IS 2747 : 1990 TAXIMETERS — PERFORMANCE
REQUIREMENTS

(First Revision)

[(Page 6, clause **6.1.12** (a) (*see also Amendment No. 1*)] — Substitute the following for the existing para:

‘Dry heat test to be at 55°C for 16 h. At the end of test, temperature shall be set to upper value of operating temperature range chosen by manufacturer. Change of temperature during heating and cooling down shall not exceed 1°C/min.’

[(Page 6, clause **6.1.12** (c) (*see also Amendment No. 1*)] — Substitute the following for the existing para:

‘Vibration test with severity of 10 to 150 Hz with amplitude of 2mm for a duration of 2 min.’

[(Page 6, clause **6.1.12** (d) (*see also Amendment No. 1*)] — Substitute the following for the existing para:

‘For mechanical shock test the taximeter placed in its normal position of use on rigid surface, is tilted towards one bottom edge and is then allowed to fall freely once from height of 50 mm on the test surface. The height of fall is the distance between the opposite edges and test surface. However, the angle made by the bottom and test surface shall not exceed 30°.’
