

AMENDMENT NO. 1 SEPTEMBER 1997
TO
IS 2801 : 1967 ACCURACY REQUIREMENTS FOR
BULK METERS USED IN PETROLEUM TRADE

(Page 7) — Insert the following new clauses at the end of the text:

‘6 MEASURING ASSEMBLY CHARACTERISTICS

7.1 The following characteristics of the measuring assembly shall be declared by the manufacturer:

- a) Maximum flow rate;**
- b) Minimum flow rate;**
- c) Maximum operating pressure;**
- d) Minimum operating pressure, if necessary;**
- e) The liquids or liquid to be measured and the limits of kinematic or dynamic viscosity (where an indication of the nature of the liquids alone is not sufficient to characterize their viscosity);**
- f) Minimum delivery; and**
- g) Temperature range, when the liquid volume can be measured at a temperature below minus 10°C.’**
