

AMENDMENT NO. 1 JULY 2015
TO
IS 2932 (PART 1) : 2013 ENAMEL, SYNTHETIC,
EXTERIOR : (a) UNDERCOATING (b) FINISHING —
SPECIFICATION

PART 1 FOR DOMESTIC AND DECORATIVE APPLICATIONS

(Fourth Revision)

[Designation ‘IS 2932 (Part 1) : 2013’ at top corner of first cover page and all subsequent pages] — Delete ‘(Part 1)’ from designation, wherever appears.

(First cover page, Hindi title) — Delete ‘भाग 1 घरेलू और सजावटी प्रयोग के लिए’

(First cover page and Page 1, English title) — Delete ‘PART 1 FOR DOMESTIC AND DECORATIVE APPLICATIONS’.

(Second cover page, Foreword, para 1, line 1) — Delete ‘(Part 1)’.

(Second cover page, Foreword, para 4 to para 6) — Substitute the following for the existing paras:

‘Revision of this standard has been taken up with a view to incorporate the limit of lead restriction in this standard. The Committee responsible for formulation of this standard observed that some paints such as the paint prescribed in this standard are ‘in practice’ used for household/decorative coatings as also for industrial and commercial applications. Taking cognizance of the fact that exposure to lead of human being, particularly children, has adverse impact on human health and safety, the Committee, therefore, felt the need to introduce lead restriction in all such paint standards.

Accordingly, during fourth revision, the Committee had split this standard into two parts that is, IS 2932 (Part 1) to deal with enamel synthetic, exterior meant for domestic and decorative applications and IS 2932 (Part 2) for industrial purposes. IS 2932 (Part 1) was published in October 2013. The issue of splitting the standard into two parts was reviewed by the Committee and it was felt that such splitting of the standard into two parts may create confusion in the minds of the consumers. The Committee therefore, decided not to proceed further with

Amendment No. 1 to IS 2932 (Part 1) : 2013

progress of IS 2932 (Part 2) of the standard and to withdraw the same from printing.

The Committee, further, decided to issue an amendment to IS 2932 (Part 1) whereby the part need to be deleted. Accordingly, this amendment is being issued.

Naturally occurring extenders/ fillers are not used as a part of the constituents of synthetic enamel based products. It is technologically feasible to formulate this product with a very low lead content. Therefore, in this standard, lead restriction up to a maximum permissible limit of 90 ppm has been prescribed, so as to prevent lead exposure of children and adults and consequent adverse impact on human health and safety and also in view of further scope for exposure of children to the dried paint surfaces. Further, majority of consumers are not aware of the consequence of lead toxicity and its long term implications to human health. Therefore, in this revision, along with lead restriction requirement, a suitable cautionary notice has been included in the marking clause’.

(Page 1, clause 1) — Substitute the following for the existing:

‘1 SCOPE

This standard prescribes requirements, methods of sampling and test for the material commercially known as enamel, synthetic, exterior: (a) undercoating (b) finishing, colour as required used in painting system for protection and decoration.’
