

Indian Standard

AMENDMENT NO. 2 MAY 1993 TO IS 13439 : 1992 ALLETHRIN — MOSQUITO MATS — SPECIFICATION

(*Second cover, foreword*) — Substitute the following for the existing matter :

“FOREWORD

This Indian Standard was adopted by the Bureau of Indian Standards, after the draft finalized by the Pesticides Sectional Committee had been approved by the Food and Agriculture Division Council.

Mosquito mats containing allethrin when heated on electrical heaters specially designed for the purpose will emit vapour of allethrin.

The mosquito mats are generally manufactured to contain allethrin 4.0 percent (*m/m*) [*d*-isomer 95 percent, minimum (*m/m*)].

The Registration Committee constituted under the *Insecticides Act, 1968* by the Government of India, has granted registration to mosquito mats containing allethrin as an active ingredient, after examining the toxicity data submitted by the applicant and satisfying itself that the product is safe to human beings if used as prescribed.

In the preparation of this standard, due consideration has been given to the provisions of the *Insecticides Act, 1968* and the Rules framed thereunder. However, the standard is subject to the restrictions imposed under these wherever applicable.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2:1960 ‘Rules for rounding off numerical values (*revised*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.”
