

AMENDMENT NO. 1 JUNE 2026
TO
IS 19412 : 2025 INCENSE STICKS (AGARBATTI) — SPECIFICATION

(Second Cover Page, Foreword, para 3) — Substitute the following for the existing:

‘Agarbatti is generally classified based on the manufacturing process, as described in Annex J.’

(Page 1, clause 4) — Substitute the following for the existing:

‘4 Manufacturing Process

The incense sticks (*Agarbatti*) are generally classified, based on the manufacturing process (*see* Annex J), as follows:

- a) Machine made *agarbatti*;
- b) Hand made *agarbatti*; and
- c) Masala *agarbatti*.’

(Page 1, clause 5.1) — Substitute the following for the existing:

‘5.1 The typical composition of incense sticks (*Agarbatti*) along with recommended percentage of ingredients is given in Table 1, for guidance purposes.’

(Page 1, clause 6.1.1) — Substitute the following for the existing:

‘6.1.1 Each incense stick (*Agarbatti*) in a packet shall be uniform in length and thickness. It shall be strong and capable of standing upright and shall not bend under its own weight when clamped, at height of 10 mm from bottom of uncoated portion. A typical representation of the clamping arrangement is given at Fig. 1.’

(Page 1, clause 6.1.1) — Insert the following figure after the clause 6.1.1:

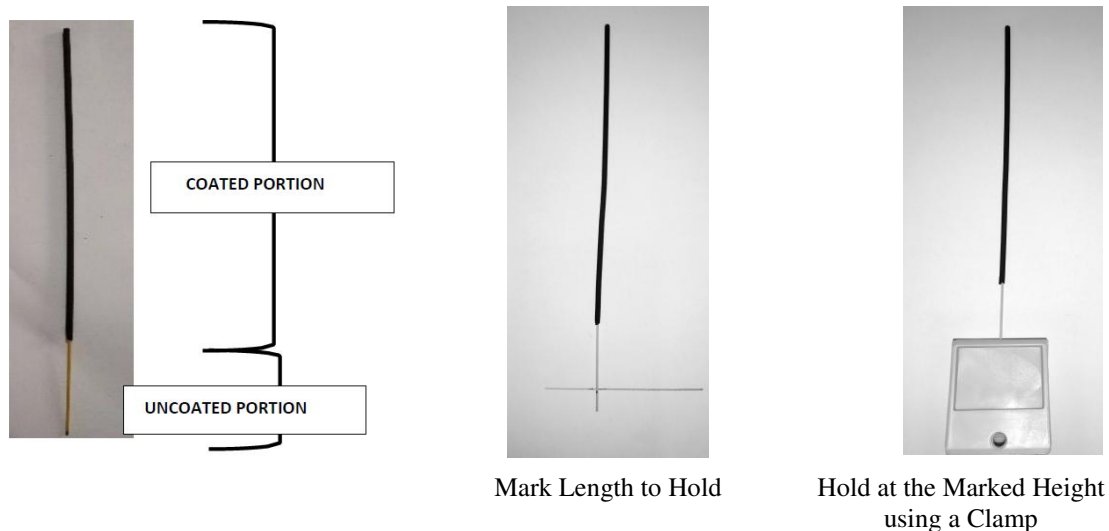

FIG. 1 TYPICAL REPRESENTATION OF CLAMPING ARRANGEMENT’

(Page 1, clause 6.1.1, Note) — Delete.

(Page 2, Table 1, Title) — Substitute the following for the existing title:

Amendment No. 1 to IS 19412 : 2025

‘Table 1 Typical Composition of Incense Sticks (*Agarbatti*) and Recommended Percentage of Ingredients, for Guidance Purposes’

(Page 2, Table 1, Header row) — Substitute the following for the existing:

Sl No.	Characteristics	Requirements		
		Machine made agarbatti	Hand made agarbatti	Masala agarbatti
(1)	(2)	(3)	(4)	(5)

(Page 2, clause 6.6) — Substitute the following for the existing:

‘6.6 Chemical Parameters

The material shall also comply with the chemical requirements given in Table 2, when tested according to the methods given in col (4) of Table 2.’

[Page 2, clause 7.2.1, Sl No. b)] — Delete and renumber subsequent serial numbers.

(Page 3, clause 7.2.2) — Delete and renumber the subsequent sub-sub-clause.

(Page 5, Annex A, clause A-1, para 1, line 1) — Substitute ‘shall’ for ‘should’.

(Page 6, Annex B, clause B-1, line 7) — Substitute ‘Fig. 2’ for ‘Fig. 1’.

(Page 6, Annex B, clause B-2, para 1) — Substitute the following for the existing last sentence:

‘The difference in length of the stick between shortest and longest uncoated portion of the stick shall not be more than 13 mm.’

(Page 6, Fig. 1) — Renumber the figure as FIG. 2.

(Page 7, Annex C, clause C-1.1, para 1) — Substitute the following for the existing last sentence:

‘The difference between each divided portion and the average mass of the total coating (average mass to be obtained by combining 3 portion weight divided by 3) of the same stick shall not be more than 30 percent.’

(Page 7, Annex C, clause C-1.2, para 1) — Substitute the following for the existing last sentence:

‘The diameter of the coating of the three portions of the same stick shall not vary by more than ± 30 percent.’

(Page 7, Annex C, clause C-2, line 4) — Substitute ‘Fig. 3’ for ‘Fig. 2’.

(Page 7, Fig. 2) — Renumber the figure as FIG. 3.

(Page 8, Annex D, clause D-2.2.1, line 3) — Substitute ‘Fig. 4’ for ‘Fig. 3’.

(Page 8, Fig. 3) — Renumber the figure as FIG. 4.

(Page 11, Annex J) — Substitute the following for the existing:

‘ANNEX J

(Foreword and Clause 4)

GENERAL CLASSIFICATION OF INCENSE STICKS (*AGARBATTI*) BASED ON MANUFACTURING PROCESS

J-1 *Agarbatti* is widely classified as:

a) *Machine Made Agarbatti*

This is a process where a mixture of charcoal powder, wood powder, and jiggit powder (a natural binder) is blended with water to form a uniform dough. The prepared dough is then coated onto a bamboo stick using machine to produce a raw *agarbatti*, which is non-fragrant at this stage.

After drying, the raw *agarbatti* sticks are dipped into a solution containing fragrance and solvent. Then, they become perfumed *agarbatti*.

b) *Hand Made Agarbatti*

These are basically the same as the above machine made *agarbatti* in composition and performance. However instead of making the raw *agarbatti* by machine, these *agarbattis* are rolled by hand.

c) *Masala Agarbatti*

Masala (or flora) *agarbatti* is the traditional way of manufacturing *agarbatti*. This is a process where charcoal, wood powder, jiggit powder, natural gums, resins, oils, flower petals, aromatic spices and fragrance are all mixed together and then made into a dough. This dough is applied on to a bamboo stick by hand/machine rolling. Once applied the finished *agarbatti* are dried and then they are ready to use. Such masala *agarbatti* do not need to be dipped again in fragrance. Masala *agarbatti* may be handmade and/or machine made, but generally they are handmade due to their soft nature and high natural content.'
