

AMENDMENT NO. 2 MARCH 1989
TO
IS : 1956 (Part 5) - 1976 GLOSSARY OF TERMS
RELATING TO IRON AND STEEL

PART 5 BRIGHT STEEL BAR AND STEEL WIRE

(First Revision)

[Page 4, clause 2.5 (see also Amendment No. 1)] — Substitute the following for the existing:

'2.5 Bar and Rod — Finished product of solid section generally supplied in straight length, which may be rectangular, square, round or half round, or polygonal. The bars may be supplied in coil form also. The dimensions generally conform to the following (see also 2.5.1):

a) *Rounds and Half-Rounds* — Minimum diameter 5 mm.

b) *Squares and Polygonals* — Minimum 6 mm side.

2.5.1 Flat Bar (Flat) — A finished product, generally of cross section, with edges of controlled contour and thickness 3 mm and over, width 400 mm and below and supplied in straight lengths. The product shall have rolled edges only (square or slightly rounded). This group also includes flat bars with bulb that has swelling on one or two faces of the same edge and a width of less than 400 mm.'
