

**AMENDMENT NO. 1 DECEMBER 2000
TO
IS 10810 (PART 42) : 1984 METHODS OF
TEST FOR CABLES**

**PART 42 RESISTIVITY TEST OF ARMOUR WIRES AND STRIPS
AND CONDUCTANCE TEST OF ARMOUR (WIRES/STRIPS)**

(*Page 2, clause 10.1*) — Substitute:

$$' \rho = \frac{R_{20} \times A'}{10\,000 \times L} \quad \text{for} \quad ' \rho = \frac{R_{20} \times A'}{100 \times L}$$

(*Page 2, clause 10.2, line 6*) — Substitute symbol '*L*' for '*P*'.

(*Page 2, clause 10.2, line 7*) — Substitute the following for the existing:

'*R_c* = resistance of main/power conductor in cable in ohm/km at 20°C
(as per IS 8130).'
