

**AMENDMENT NO. 3 FEBRUARY 2005
TO
IS 13828 : 1993 IMPROVING EARTHQUAKE
RESISTANCE OF LOW STRENGTH MASONRY
BUILDINGS — GUIDELINES**

(Page 3, clause 7) — Substitute the following for the existing clause

7 CATEGORIES OF BUILDINGS

7.1 For the purpose of specifying the earthquake resistant features in masonry and wooden buildings, the buildings have been categorized in five categories A to E based on the seismic zone and the importance of building *I*, where *I* = Importance factor applicable to the building [see 6.4.2 and Table 6 of IS 1893 (Part 1) : 2002]

7.1.1 The building categories are given in Table 1

**Table 1 Building Categories for Earthquake
Resistant Features**

Importance Factor	Seismic Zone			
	II	III	IV	V
1.0	B	C	D	E
1.5	C	D	E	E

NOTES
1 Category A is now defunct as zone I does not exist any more
2 Low strength masonry shall not be used for category F

(Page 3, Table 1 under clause 8.1.1) — Delete
