

AMENDMENT NO. 1 JUNE 1967

TO

**IS : 1780-1961 SPECIFICATION FOR
VEGETABLE TALLOW**

Alteration

(Page 7, clause A-5) — Substitute the following for the existing clause:

'A-5. DETERMINATION OF UNSAPONIFIABLE MATTER

A-5.0 Determine the unsaponifiable matter, percent by weight, using the method given under 8 of IS : 548-1964*, and calculate as follows.

A-5.1 Calculation

A-5.1.1 Weight in g of the fatty acids in the extract (as oleic acid) = $B = 0.282 VN$

where

V = volume in ml of standard sodium hydroxide solution, and

N = normality of standard sodium hydroxide solution.

A-5.1.2 Unsaponifiable matter, percent

$$\text{by weight} = \frac{100 (A - B)}{W}$$

where

A = weight in g of the residue,

B = weight in g of the fatty acids in the extract (see A-5.1.1), and

W = weight in g of the total fatty matter content of the material taken for the test. '

*Methods of sampling and test for oils and fats (revised).
