

**AMENDMENT NO. 1 JANUARY 2019
TO
IS 16219 : 2014 AUTOMOTIVE VEHICLES — METALLIC
FUEL TANKS — SPECIFICATION**

[Page 2, *clause 4.9.1 c)*] — Substitute the following for the existing:

‘c) Any other provision which has the same effect. Examples may include, but are not limited to a tether filler cap, a chained filled cap or one utilizing the same locking key for the filler cap and for the vehicle’s ignition. In this case, the key shall be removable from the filler cap only in the locked condition. However, the use of tethered or chained filler cap by itself is not sufficient for vehicles other than those of categories M1 and N1. In case of M2 category of vehicles having fuel filler cover for accessing fuel cap, tethered or chained fuel cap is sufficient, provided, fuel filler cover has locking mechanism which can be opened either with key or with control located inside the vehicle.’

(Page 2, *clause 7*) — Substitute the following for the existing:

‘7 CONFORMITY OF PRODUCTION

For ensuring conformity of production one fuel tank shall be demonstrated to comply with the requirements of hydraulic test once in every two years.’

(Page 3, *clause 9.1*) — ‘Delete the clause and renumber **9.2** and **9.2.1** as **9.1** and **9.1.1**.’
