

AMENDMENT NO. 1 MARCH 1989
TO
IS : 5555 - 1970 CODE OF PROCEDURE FOR
CONDUCTING FIELD STUDIES ON
ATMOSPHERIC CORROSION OF METALS

(*Page 7, clause 6.1*) — Substitute the following for the existing clause:

'6.1 Identification marks shall not be stamped on the specimens as they are likely to be obliterated by corrosion. Instead holes can be made at any one of the nine places lengthwise in each of the three rows. First row indicates the units 1 to 9, second row indicates 10 to 90 and third row indicates 100 to 900. As an example Fig. 2 shows specimens No. 59. It has a hole at the fifth place in tens (second row) and a hole at the ninth place in units (first row). The specimen number can be identified with the help of master panel sheet.'

(*Page 7, Fig. 2*) — Substitute the figure on page 2 for the existing figure:
