

AMENDMENT NO. 1 AUGUST 2017
TO
IS 9505 : 2007 MONOSODIUM L-GLUTAMATE, FOOD
GRADE — SPECIFICATION

(First Revision)

[Page 1, clause 3.2.5] — Insert the following new clause:

‘3.2.6 Pyrrolidone Carboxylic Acid

Weigh 1g of monosodium L-glutamate and dissolve in 100 ml of water, test solution. Separately, weigh 1 g of pyrrolidone carboxylic acid and dissolve in water, reference solution. Drop 1 μ l of test solution and reference solution on thin layer plate prepared by using silica gel for thin-layer chromatography, and develop about 10 cm by using n-butanol: glacial acetic acid : water mixture (2:1:1) as developing solvent. Dry the thin layer plate at 80°C for 30 min. Spray colour developing solution to it and heat it at 80°C for 10 min. Pyrrolidone carboxylic acid spot in test solution should not be observed at the same position as reference solution.’

[Page 1, Table 1, Sl No. (v)] — Substitute the following for the existing:

Sl No.	Characteristic	Requirement	Method of Test, Ref to	
			Annex of this Standard	Clause of IS 1699
(1)	(2)	(3)	(4)	(5)
v)	Lead, mg/kg, Max	1	—	15
