

AMENDMENT NO. 1 DECEMBER 1990
TO
IS 9506 : 1980 METHOD FOR DETERMINATION OF
SULPHATE (VOLUMETRIC)

(*Page 5, clause 3.2.2, first sentence*) — Substitute the following for the existing sentence:

'Weigh about 1 g of the ground sample accurately, dissolve in 10 ml of concentrated hydrochloric acid and evaporate to dryness.'

(*Page 6, clause 3.2.3*) — Substitute the following for the existing matter:

$$\text{'Sulphate (as SO}_4 \text{), percent by mass} = \frac{V_1 M_1 - V_2 M_2}{M} \times 0.098 \times 100$$

where

V_1 = volume in ml of EDTA solution added,

V_2 = volume in ml of magnesium chloride solution required for back titration,

M_1 = molarity of EDTA solution,

M_2 = molarity of magnesium chloride solution, and

M = mass in g of the sample taken in the aliquot of the solution for the test.'

(CHD 1)
