

**AMENDMENT NO. 1 APRIL 2014
TO
IS 14766 : 2000 AGGREGATE SIZE DISTRIBUTION AND
WATER STABILITY OF SOIL AGGREGATES —
METHOD FOR DETERMINATION**

(Page 3, clause 8.3) — Substitute the following formula for geometric mean diameter for the existing:

Geometric Mean Diameter (GMD)

$$\text{GMD} = \exp \left(\frac{\left(\sum_{i=1}^n w_i \log x_i \right)}{\sum_{i=1}^n w_i} \right)$$

where

- w_i = weight of aggregates in a size class, in g;
 x_i = mean diameter of aggregates in a size class, in mm;
 n = number of aggregate size classes; and
 $\sum_{i=1}^n w_i$ = total weight of the sample, in g.
