

AMENDMENT NO. 1 OCTOBER 2025
TO
IS 16890 : 2024 TEXTILES — PROTECTIVE CLOTHING FOR FIREFIGHTERS —
SPECIFICATION
(First Revision)

(Page 1, clause 1, para 2) — Substitute the following for the existing:

‘Both Category 1 and Category 2 of protective clothing are recommended for work associated with intense structural firefighting, close firefighting operations, rescue operations, outdoor firefighting as well as support activities. However, Category 2 of protective clothing addresses protection requirements for increased risk of convective and radiant heat and/or flame exposures as compared to Category 1 protection requirements. Also, Category 2 covers higher mechanical performance test requirements in terms of tensile strength and tear strength so that the protective clothing can be deployed for more intense firefighting and rescue applications. To facilitate flexibility and comfort for firefighting and rescue applications, the Category 2 protective clothing also stipulates lighter garment assembly compared to Category 1 garment using lower weight of fabric layer assembly without lowering the performance requirements related to protection against convective and radiant heat.’

(Page 6, clause 7.5, line 4) — Substitute ‘minimum’ for ‘maximum’.
