

Ferro Alloys Sectional Committee, MTD 05

FOREWORD

This Indian Standard (Fourth Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Ferro Alloys Sectional Committee had been approved by the Metallurgical Engineering Division Council.

This standard was first issued in 1962 and was subsequently revised in 1963, 1970 and 1984, respectively. In view of the experience gained during these years it was felt necessary to revise this standard. The following main modifications have been made in this revision:

- a) Limits of impurities like lead and tin have also been incorporated.
- b) Informations to be given while ordering the material have been incorporated for the benefit of the purchaser, and
- c) New clauses have been incorporated to avoid wide segregation of the chemical constituents, thereby safeguarding the small consumers of this product.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

AMENDMENT NO. 1 MAY 1995
TO
IS 1469 : 1993 FERROMOLYBDENUM —
SPECIFICATION
(Fourth Revision)

(Page 1, clause 2) — Substitute the following for the existing entries:

<i>IS No.</i>	<i>Title</i>
12614 (Part 1) : 1988	Determination of molybdenum
12614 (Part 3) : 1988	Determination of silicon

(Page 1, clause 3.3.3, para 2, line 1) — Substitute 'content' for 'concept'.

(Page 2, Table 1, col 1, first entry under 'High Carbon') — Substitute 'FeMo 57C600' for 'FeMo 63C600'.

(Page 2, Table 1, col 1, second entry under 'High Carbon') — Substitute 'FeMo 63C600' for 'FeMo 57C600'.
