

AMENDMENT NO. 3 NOVEMBER 1988

TO

IS : 9900 (Part 1) - 1981 SPECIFICATION FOR HIGH
PRESSURE MERCURY VAPOUR LAMPS

PART 1 REQUIREMENTS AND TESTS

[Page 9, clause 8.1 (see also Amendment No. 2)] — Insert the following new clause after 8.1.

'8.2 The life test shall be carried out on an ac supply with a declared frequency of 50 Hz which shall be the rated frequency of the ballast. The test voltage shall be equal to the rated voltage of the ballast ± 1 percent.

For life testing, commercial ballasts with electrical parameters not differing by more than 3 percent from the reference ballast can be used.

The life test shall be made at an ambient temperature between 15°C and 50°C.

The momentary fluctuation of the test voltage and frequency during the test shall not exceed ± 2 percent in each case.

8.2.1 *Switching 'on' and switching 'off' during life test* — Lamps on life test shall be switched 'off' after every 7½ hours of burning, each 'off' period consisting of ½ hour duration. The 'off' period shall not be included in calculating the number of burning hours. The life test, as far as possible, shall be done continuously.'
