

AMENDMENT NO. 1 SEPTEMBER 1984

TO

IS:9962-1981 SPECIFICATION FOR STEEL
WIRE FOR NEEDLES

Alterations

(Page 4, clause 5.1, first three lines) -
Substitute the following for the existing matter:

'5.1 The ladle analysis of steel for the various types of wires for needles, when carried out either by the method specified in the relevant parts of IS:228† or any other established instrumental/chemical method shall have the following chemical composition. In case of dispute the procedure given in IS:228† and its relevant parts shall be referee method.'

(Page 7, clause 11.1) - Substitute the following for the existing matter:

'11.1 Unless otherwise agreed to, the method of drawing representative samples of wires and criteria for conformity shall be as specified in IS:10206-1982*.'

(Page 7) - Add the following foot-note at the bottom of the page:

'*Methods of sampling steel wires.'

(Pages 7 and 8, Appendix A) - Delete.

(SMDC 5)
