

AMENDMENT NO. 3    APRIL 1978  
TO  
IS:3743-1966   SPECIFICATION FOR HAIR  
CLIPPERS (HAND-OPERATED)

Alterations

*(Pages 4 and 5, informal table under clause 3.1, third column)*

- a) *Against Sl No. 8* - Substitute the following for the existing matter:

'Carbon steel T50 of Schedule VI of IS:1570-1961†. Sulphur and phosphorus not to exceed 0.05 percent.

OR

Mild steel case carburized to give a hardness of not less than 450 HV.'

- b) *Against Sl No. 11* - Substitute 'Mild steel' for 'Brass'.  
c) *Against Sl No. 14 (see Amendment No. 1)* - Substitute the following for the existing matter:

'Free cutting mild steel'.

*(Page 5, clause 4.2)* - Substitute the following for the existing clause:

'4.2 The teeth in the top and bottom plates shall be made as shown in Fig. 3 and 1

The number of teeth for commercial size designation No. 0 shall be 25 for top plate and 26 for bottom plate. The pitch of the teeth shall be as given below:

| <i>Commercial Size<br/>Designation</i> | <i>Pitch of Teeth<br/>mm</i> |
|----------------------------------------|------------------------------|
| No. 1                                  | 2.0                          |
| No. 0                                  | 1.6                          |
| No. 00                                 | 1.6                          |
| No. 000                                | 1.6                          |
| No. 0000                               | 1.2                          |
