

AMENDMENT NO. 1 JUNE 2024
TO
IS 3028 (PART 2) : 2023 AUTOMOTIVE VEHICLES — NOISE EMITTED BY
MOVING VEHICLES — SPECIFICATION AND METHOD OF MEASUREMENT
PART 2 OTHER THAN L 2 AND L 5 CATEGORY

(First cover page and page 1, title) — Substitute the following for the existing:

‘Indian Standard

**‘IS 3028 (Part 2) : 2023 AUTOMOTIVE VEHICLES — NOISE EMITTED BY MOVING VEHICLES —
SPECIFICATION AND METHOD OF MEASUREMENT
PART 2 M AND N CATEGORY’.**

(Page 14, clause 7.3) — Substitute the following for the existing:

‘7.3 Sound Level Limits

7.3.1 The sound level measured in accordance with the provisions of **B-3.1**, mathematically rounded to the nearest integer value, shall not exceed the limits prescribed in Table 2.

7.3.1.1 For vehicle types of categories M1 derived from N1 vehicle types having a technically permissible maximum laden mass above 2.5 tons and a R-point height greater than 850 mm from the ground, the limits of vehicles type of category N1 having a technically permissible maximum laden mass above 2.5 tons shall apply.

7.3.1.2 For vehicle types designed for off-road use as defined in IS 14272, the limit values shall be increased by 2 dB(A) for M3 and N3 vehicles category and 1 dB(A) for any other vehicle category. For vehicle type of category M1 the increased limit values for off-road vehicles are only valid if the technically permissible maximum laden mass > 2 tons.

7.3.1.3 Limit values shall be increased by 2 dB(A) for wheelchair accessible vehicles of category M1 constructed or converted specifically so that they accommodate one or more persons seated in their wheelchairs when travelling on the road, and armored vehicles, as defined in IS 14272.

7.3.1.4 For vehicle type of category M3 having a gasoline only engine, the applicable limit value is increased by 2 dB (A).

7.3.1.5 For vehicle type of category N1 having a technically permissible maximum laden mass ≤ 2.5 tons, the engine capacity not exceeding 660 cc and the power-to-mass ratio (PMR) calculated by using the technically permissible maximum laden mass not exceeding 35 and a horizontal distance ‘d’ between the front axle and the driver’s seat R-point of less than 1 100 mm, the limits of the vehicle type of category N1 having a technically permissible maximum laden mass above 2.5 tons shall apply.’

Price Group 1

Amendment No.1 to IS 3028 (Part 2) : 2023

(Page 15, Table 2) — Substitute the following for the existing:

Table 2 Maximum Limit of Sound Levels

(Clause 7.3.1)

Sl No.	Vehicle Category	Vehicles Used for the Carriage of Passengers and Goods	Limit Values [dB(A)]	
			Stage 1	Stage 2
(1)	(2)	(3)	(4)	(5)
i)	M1	$PMR \leq 120$	72	70
		$120 < PMR \leq 160$	71	71
		$PMR > 160$	73	73
		$PMR > 200$, no. of seats ≤ 4 , R-point height < 450 mm from the ground	74	74
ii)	M2	$M \leq 2.5 \text{ t}$	72	70
		$2.5 \text{ t} < M \leq 3.5 \text{ t}$	72	72
		$M > 3.5 \text{ t}; P_n \leq 135 \text{ kW}$	73	73
		$M > 3.5 \text{ t}; P_n > 135 \text{ kW}$	74	74
iii)	M3	$P_n \leq 150 \text{ kW}$	74	74
		$150 \text{ kW} < P_n \leq 250 \text{ kW}$	77	77
		$P_n > 250 \text{ kW}$	78	78
iv)	N1	$M \leq 2.5 \text{ t}$	72	71
		$M > 2.5 \text{ t}$	73	73
v)	N2	$P_n \leq 135\text{kW}$	75	75
		$P_n > 135 \text{ kW}$	76	76
vi)	N3	$P_n \leq 150 \text{ kW}$	77	77
		$150 \text{ kW} < P_n \leq 250 \text{ kW}$	79	79
		$P_n > 250 \text{ kW}$	81	81
Where, PMR = power to mass ratio index, M = permissible maximum laden mass and P_n = rated maximum net power’				

(Page 25, clause B-2.2.2, Note) — Substitute the following for the existing:

‘NOTE — Given that the tyre contribution for overall sound emission is significant, regard shall be given for existing regulatory provisions concerning tyre/road sound emissions. Traction tyres, snow tyres and special-use tyres as defined in IS 18258 shall be excluded during type-approval measurements.’
