

AMENDMENT NO. 1 JULY 1980
TO
IS:3066-1965 SPECIFICATION FOR HOT ASPHALT
MIXING PLANTS

Addenda

(Page 9, clause 14.2.1) - Add the following new clause after 14.2.2:

'14.2.3 Hopper for aggregate as well as bitumen, may also be suspended from electric load cells of at least 25 percent more capacity than the actual aggregate or bitumen to be weighed. The load cell in turn can be connected to a dial either in operators cabin, or at a convenient place, so that the operator can easily check the weight of aggregate and bitumen thus weighed. The dial used, shall conform to IS:1853-1961*.'

(Page 9, foot-note) - Add the following new foot-note at the end:

'*Specification for self indicating and semi-self indicating counter type weighing machines.'

(BDC 28)
