

AMENDMENT NO. 1 OCTOBER 2019
TO
IS 4011 : 2018 METHODS OF TEST FOR SAFETY
EVALUATION OF COSMETICS

(Third Revision)

(Second cover page, Foreword, para 2) — Insert the following new para at the end of para 2:

“All cosmetic products should be formulated conforming to the restrictions imposed by IS 4707 (Part 1) : 2017 ‘Classification of cosmetics raw materials and adjuncts : Part 1 Colourants (*third revision*)’ and IS 4707 (Part 2) : 2017 ‘Classification of cosmetics raw materials and adjuncts : Part 2 List of raw materials generally not recognized as safe for use in cosmetics (*fourth revision*)’ and the lists of Personal Care Products Council (PCPC), Regulation (EC) No. 1223/2009 and the guidelines of International Fragrance Association (IFRA) as updated from time-to-time. Cosmetic products formulated on the above lines are likely to be safe and such products may not warrant any safety testing. However, any cosmetic preparation formulated using the ingredients indicated above, may be subjected to safety evaluation according to the test methods stipulated in the standard, if the manufacturer feels it necessary. Whereas products which contain novel ingredients which are not under the purview of the above documents shall require safety testing using the guidelines provided in this standard.”

[Page 4, clause 4.3.1.4 a)] — Substitute the following for the existing:

‘a) Positive control must give a combined mean score of >2.0 . Negative control must give a combined mean score of < 2 . If positive control gives a combined mean score less than 2.0 and/or negative control gives a combined mean score of >2.0 , then the test need to be repeated on another group of newly recruited volunteers.’
