

**AMENDMENT NO. 1 NOVEMBER 2009
TO
IS 4020 (PART 8) : 1998 DOOR SHUTTERS —
METHODS OF TESTS**

(Third Revision)

(Page 8, clause 3.1, last sentence) — Substitute the following for the existing:

‘The spherical leather bag shall be pulled away from the door to a height of 230 mm from the plane of striking place and the normally hung shutter (with hangings, fixings and fastenings) shall be given five impacts at the handle level on both sides of the shutter.’
