

AMENDMENT NO. 1 APRIL 1975

TO IS : 4072-1975 SPECIFICATION FOR STEEL FOR SPRING WASHERS

(First Revision)

The Ministry of Industrial Development, Government of India, in Gazette Notification No. S. O. 294(E)/IDRA/29B/1/74/7 dated 16 May 1974, has allowed the various mini steel plants and electric furnace units to diversify their products and to obtain ISI licence to cover such products under ISI Certification Marks Scheme. Most of these manufacturing units will be initially making ingots [including cast billet ingots, for definition refer to IS : 6914-1973 Specification for carbon steel cast billet ingots for rolling into structural steel (standard quality)] or billets for further rolling into finished products. It is, therefore, felt that till such time as separate specifications are formulated for these, provision should be made to include ingots and billets in this specification.

The size of ingot or billet for any given size of finished steel product should be such that a minimum of 95 percent reduction in cross sectional area is involved.

The clauses in this specification which refer only to the end products shall not apply to ingots and billets.

Addenda

(Page 3, clause 1.1) — Add the following new clause after 1.1:

' 1.2 This standard also covers the requirements for ingots and billets intended to be used for the manufacture of spring washers.'

(Page 5, clause 6.1) — Add the following new clause after 6.1:

6.1.1 Ingots and billets shall be sound and cleanly cast to the specified dimensions. They shall be free from harmful defects, such as cracks; laminations; rough, jagged and imperfect edges; exposed piping and heavy refractory inclusions.

(Page 5, clause 7.1) — Add the following new clause after 7.1:

' 7.2 The tolerances for cast billet ingots and billets shall be as given in IS : 6914-1973* and IS : 2830-1975† respectively, the tolerances for ingots of other sizes shall be subject to mutual agreement between the purchaser and the manufacturer.'

(Page 5, clause 8.1) — Add the following foot-notes after 8.1:

*Specification for carbon steel cast billet ingots for rolling into structural steel (standard quality).

†Specification for carbon steel billets, blooms and slabs for re-rolling into structural steel (standard quality) (first revision)

(Page 6, clause 9.1) — Add the following at the end of the clause:

‘ In the case of ingots and billets the material may be supplied in the as-cast condition.’

(Page 6, clause 12.1) — Add the following after this clause and re-number the subsequent clause:

‘ 12.1.1 Each ingot and billet shall be legibly stamped or painted with cast number, grade and the name or trade-mark of the manufacturer.’

(SMDO 5)
