

AMENDMENT NO. 2 AUGUST 2005
— TO
IS 3321:1973 SPECIFICATION FOR
FORMALDEHYDE SOLUTION

(First Revision)

(Page 10, clause A-6.2.1.2, *Chromic Oxide Solution*) — Insert the following note:

‘NOTE — The oxide of chromium may be digested with alkaline hydrogen peroxide before dissolving in acidulated water to get a clear solution.’

(Page 10, clauses A-6.2.3 and A-6.2.3.1, *Calculation*) — Substitute the following for the existing equation:

Methanol, percent by mass = $1.0017 + 0.003 F - D/0.00253$

where

F = formaldehyde content, and

D = specific gravity.
