

AMENDMENT NO. 1 DECEMBER 1979
TO
IS:8081-1976 SPECIFICATION FOR SLOTTED SECTIONS
Alterations

(Page 4, clause 2.1) - Substitute the following
for the existing clause:

'2.1 Slotted Section— A structural member cold formed from a metal strip, extrusion (in case of aluminium only) generally of angle, channel, flat and tee sections. These sections have a repetitive pattern of perforation and are fastened together by bolts/screws and nuts. The shape of the perforations should be continuous curve free of a corner or a notch.'

(Page 5, clause 5.4, line 3) - Delete the words
'shall be given as even finish'.

(Page 9, clause 6.6.2.1, line 1) - Substitute
'shall' for 'will'.

(SMBDC 7)
