

**AMENDMENT NO. 4 NOVEMBER 1990
TO
IS 6639:1972 SPECIFICATION FOR HEXAGON
BOLTS FOR STEEL STRUCTURES**

**[Page 3, clause 3 (see also Amendment No. 3)] -
Insert the following after 3:**

'3.1 For tensile, proof load and wedge loading tests, three threads (3 X P) only shall be exposed between the grips. This is obtained by freely running the nut or fixture to the fullest extent and then unscrewing the specimen three full turns.'
