

AMENDMENT NO. 1 OCTOBER 1997
TO
IS 11766 : 1986/ISO 6092 - 1980 METHOD FOR
DETERMINATION OF TITRATABLE ACIDITY IN
MILK POWDER AND SIMILAR PRODUCTS
(ROUTINE METHOD)

(*Page 1, National Foreword*) — Insert the following at the end:

‘For calculating the titratable acidity in terms of percentage, the following formula may be used:

$$\text{Percentage titratable acidity (as Lactic Acid)} = 0.09 \times 2 \times V$$

where

V = volume in millilitres of sodium hydroxide solution used for titration.’

(FAD 57)
