

AMENDMENT NO. 1 MAY 1983

TO

**IS:5151-1969 METHOD FOR EVALUATING THE RELATIVE
EFFICIENCY OF WETTING AGENTS FOR MERCERIZATION**

(This amendment has been carried out for giving the details of preparation of wetting agent and caustic soda solution)

Alteration

(Page 5, clause 4.3.1, Note 2) - Substitute the following for the existing note:

'NOTE 2 – It is often better to mix the wetting agent thoroughly with small volume of the caustic soda solution before adding this to the bulk of the mercerising solution. It should be particularly noticed whether the wetting agent remains well dispersed or dissolved, because separation of an immiscible layer on the surface would entirely viciate the results and give false values.'
