

AMENDMENT NO. 1 AUGUST 2024
TO
IS 5176 : 2023 TEXTILES — HAWSER LAID HEMP ROPES — SPECIFICATION
(Second Revision)

(Foreword, second para) — Substitute the following for the existing:

‘The hemp fibre is a natural plant fibre that contains 73 percent to 77 percent w/w cellulose, 7 percent to 9 percent w/w hemicellulose and 4 percent to 6 percent w/w lignin. Cellulose is a homogeneous linear polymer constructed of repeating glucose units. It is a highly crystalline polysaccharide. Long durability is hemp’s natural quality and can easily run for years without becoming weak or getting damaged.’

[Page 3, clause 8.3(c)] — Substitute the following for the existing:

- ‘c) Individual values of the test results of the lot in respect of other characteristics conform to the specified requirements.’
