

**AMENDMENT NO. 1 MAY 2002
TO
IS 6287 : 1985 METHODS OF SAMPLING AND
ANALYSIS FOR SUGAR CONFECTIONERY**

(First Revision)

(Page 13, clause 8.3.1, line 6) — Substitute 'm' for 'M'.

(Page 13, clause 8.3.2) — Insert '(R)' after 'Reducing sugars, percent by mass'.

(Page 15, clause 9.3) — Substitute the following for the existing:

'9.3 Calculation

9.3.1 See 8.3.1 and 8.3.1.1.

9.3.2 Reducing Sugar (R_1) = $\frac{m_1}{M_1} \times 10$

where

m_1 = milligrams of anhydrous dextrose in 1 ml of solution (see 9.3.1), and

M_1 = mass in g of the prepared sample used for making 100 ml of final solution (see 9.2).

9.3.3 Sucrose, percent by mass = ($R_1 - R$) $\times$ 0.95

where

R_1 = reducing sugar obtained after inversion, and

R = reducing sugar originally present (see 8.3.2).
