

AMENDMENT NO. 2 MAY 2026
TO
IS 6356 : 2021 TOOTHPASTE — SPECIFICATION
(Fourth Revision)

(Foreword, para 9, line 6) — Substitute the following for the existing:

‘However, in case of dispute, the method described in Annex D of this standard will be the referee method except in case of toothpaste containing stannous fluoride where the method described in IS 16913 (Atomic Absorption Spectrometry) shall be the referee method.’

[Page 2, Table 1, Sl No. (iii), col (2) — Substitute ‘Heavy metals (as lead)², parts per million, *Max*’ for ‘Heavy metals (as lead), parts per million, *Max*’.

[Page 2, Table 1, Sl No. (iii), col (5)] — Substitute ‘D or IS 16913’ for ‘D’.

(Page 2, Table 1, footnote) — Insert the following at the end:

² For toothpastes containing stannous fluoride, the finished product shall be tested for heavy metals by the method described in IS 16913 (Atomic Absorption Spectrometry - AAS) for lead, arsenic, and mercury, and the product shall be considered as meeting the requirements of this standard if it contains not more than 20 ppm of these heavy metals calculated as the total of the respective metals.’
