

TO

IS:841-1983 SPECIFICATION FOR STEEL HAMMERS

(Second Revision)

(Page 1, clause 4.1.1) - Add the following at the end of the clause:

'This requirement is only for the guidance of the manufacturers.'

(Page 10, clause 15.2) - Substitute the following for the existing clause:

'15.2 The hammer heads shall be fitted with handles and struck four times against the cast iron or mild steel block in case of flat faced hammers and block of cast iron in case of pointed hammers. The blocks shall have hardness within the range of 380 to 420 HB. They shall not show any damage or deflection at the end of this test.'

(Page 10, clause 15.2.1) - Substitute the following for the existing clause:

'15.2.1 In addition to the test specified at 15.2, each face and the pein if any, shall be struck with 100g ball pein hammer, having hardness specified at 4, without perceptible indentation of the face or pein of the hammer tested.'

(Page 10, clause 15.2.2) - Delete.

(EDC 12)
