

AMENDMENT NO. 1 OCTOBER 2023

TO

**IS 17373 : 2020 GEOSYNTHETICS — GEOGRIDS USED IN REINFORCED SOIL
RETAINING STRUCTURES — SPECIFICATION**

(Page 1, Clause 3.8) — Insert the following new clauses after **3.8**:

‘3.9 Style Number — A theoretical number given to geogrid which refers geogrid with specific designed ultimate tensile strength in machine and cross machine direction. For example ‘30/40’ type geogrid refers, geogrid having ultimate tensile strength ‘30’ kN/m in machine direction and ‘40’ kN/m in cross machine direction.

3.10 Elongation at Designated Load — Elongation measurement of geogrids at designed load. That is, for a geogrid of type 30/40, the elongation shall be tested at ‘30’ kN/m load in machine direction and ‘40’ kN/m load in cross machine direction.’
