

AMENDMENT NO. 1 FEBRUARY 2026
TO
IS 9228 : 2019 CHAIRS FOR CHAIRLIFTS — SPECIFICATION
(First Revision)

(Page 1, clause 4.1) — Substitute the following for existing:

‘4.1 The suspension bar shall be made from steel sections. Closed sections like hot or cold formed seamless tubes as per IS 4923 and IS 1161 may be used however ERW or HFW is not permitted. Open steel sections like angles, channels, etc, may be used. In that case the seam/butt weld shall be full strength with bevelling.

The steel used should be tested to have a strength equal to that specified for E250 to E350 as per IS 2062.

If operations are expected in temperatures below 0 °C, the steel should be charpy impact tested under - 20 °C and must show a test result not less than 27 joules.’

(Page 1, clause 5.1.5) — Insert the following at the end:

‘5.1.6 Seating Arrangement

Seat width: 450 mm to 500 mm per passenger.

On either direction backrest shall be minimum 300 mm, suitably positioned for comfort.’
