

AMENDMENT NO. 1 FEBRUARY 1979
TO
IS : 548 (Part II)-1976 METHODS OF SAMPLING
AND TEST FOR OILS AND FATS

PART II PURITY TESTS

(Third Revision)

Alterations

(Page 6, clauses 6.3 and 7.3; page 7, clauses 8.3 and 9.3; page 15, clause 14.3 and page 18, clause 16.5, line 1) — Substitute 'generally sensitive' for 'sensitive'.

(Page 11, clause 11.2.2, first sentence) — Substitute the following for the existing sentence:

' Pour 30 ml of the oil into a 250-ml conical flask and mix well with about 50 ml of water.'

(Page 13, clause 12.2.3, Note):

a) Line 1 — Substitute 'sample' for 'sampling'.

b) Line 3 — Substitute '12.2.3' for '10.2.3'

(Page 13, clause 13.1.2, line 4) — Substitute '27°C is 0.880 7' for '15.5°C is 0.889 8'.

(Page 14, clause 13.2.2, line 2) — Substitute 'litre' for 'titre'.

Addenda

(Page 3, contents, item 18) — Add the following new item after item 18:

' 19. TEST FOR THE PRESENCE OF OIL SOLUBLE COLOURS
IN OILS AND FATS

25'

(Page 6, clause 6.2) — Add the following new note after 6.2:

' NOTE — Test the sample for presence of colouring matter which are chromogenic in presence of hydrochloric acid. For this purpose, take 5 ml of the sample in a 25-ml measuring cylinder provided with a glass stopper and shake with 5 ml of concentrated hydrochloric acid. If there is no development of a pink or red colour in the aqueous layer, apply the test as prescribed in 6.2. If pink or red colour develops in the aqueous layer, remove the red acid layer which collects at the bottom and repeat the procedure until no further colouration takes place. After complete removal of hydrochloric acid layer, perform the test on the sample so obtained as prescribed in 6.2.'
